Los Angeles County population continued to climb during 1965 reaching 6,954,350 on January first. This is an estimated growth of 33,222 during the past quarter, the addition of 133,000 persons in 1965 and an increase of slightly more than 911,000 since the 1960 Census.

The January first population of the County's 76 cities totaled 5,845,833. This new total represents a gain of 122,493 during the past year. Net population growth was responsible for the major share of this gain although some of it was the result of annexation. However, no incorporation occurred during 1965. This was only the second year since 1955 in which no new city was formed.

The population within the unincorporated area experienced a net gain of 10,652 during the year to reach a January 1, 1966 total of 1,108,517. This new total is but slightly larger than the 1960 Census count of 1,096,250. However, in the almost six years since the last decennial census, eight incorporations and over 800 annexations have transferred an estimated 227,000 persons from the unincorporated area.

Leading the cities in numerical growth in 1965 was Los Angeles whose January 1, 1966 population of 2,764,568 represented an increase of 52,400 or 1.9% for the year. In terms of percentage of increase, Torrance led the ten largest cities with an annual gain of 6.9% or a population addition of 8,834. Torrance also had the distinction during the fourth quarter of displacing Glendale as the third most populous city in the County. Torrance had previously moved into fourth place on April 1, 1964.

## Downward Trend Resumes

During the fourth quarter of 1965, net additions to the Los Angeles County housing inventory dropped to their lowest point in 15 years, declining from a third quarter total of 14,576 units to 11,087 units for the final three months of the year. This renewed downward movement erased hopes that the upturn experienced in the third quarter of 1965 might be

a reversal of the continuing decline in net new housing available first evident in the fourth quarter of 1964.

Although the decline was general, occurring in each dwelling unit category, single units experienced the greatest numerical loss dropping 1,983 units to a fourth quarter total of 2,512 units. Net additions of multiple units slumped to 8,265 units added or 1,322 fewer than in the previous quarter. This is the smallest quarterly addition of multiple units since the second quarter of 1961.

Annual net dwelling unit additions for 1965 totaled 54,256. This increase was the second lowest annual net gain in the past 15 years exceeding only the 52,946 units added in 1960. Annual net dwelling unit gains for the five years previous to 1965 were as follows: 1964 — 100,288; 1963 — 77,375; 1962 — 65,088; 1961 — 56,532; 1960 — 52,946; and 1959 — 60,934.

## All Major Statistical Areas Show Net Dwelling Unit Increase

A recently completed survey of the 1965 housing trends in the 35 Major Statistical Areas revealed that each had an annual net dwelling unit increase in spite of net single unit losses in 11 of the areas. Seven of the areas showing such losses lie within ten miles of downtown Los Angeles and large comprise the central core of the Los Angeles-Long Beach Standard Metropolitan Statistical Area. These seven had the following net reductions in single dwelling units: Adams Area 452; East Area 309; Southeast Area 284; Northeast Area 241; Wilshire Area 166; Hollywood Area 133; and Central Area 106. However, the aggregate loss of 1,691 single units within these seven areas was more than compensated for by a corresponding total net gain of 11,320 multiple units.

The other four Major Statistical Areas showing net single unit losses in 1965 were: Santa Monica-Venice Area 239; Inglewood 93; Long Beach Area 39; and Pasadena Area 17.

## Adjustments

Three major annexations occurred during the quarter which required the following dwelling unit transfers: 1,757 units from S.A. 8.31 to S.A. 8.2 (Lynwood City); 521 units from S.A. 12.22 to S.A. 12.3 (South El Monte City) and 1,252 units from S.A. 28.65 to 28.3 (San Gabriel City).

Several other Statistical Area adjustments were made in this issue. These reflect the availability of more current data and should not be interpreted as indicating either a sudden gain or loss.

## Los Angeles County Population

April 1, 1966 *Estimate* .....6,976,175

## County Population Increases 933,000 in Six Years

The population of Los Angeles County has increased an estimated 933,000 or 15.4% since the Census of 1960. This gain represents a six year average annual increase of 155,000 or a gain of 2.6% a year. In still other terms, it means that the twin sources of net natural increase and net migration added an average of 426 persons a day to the county's population during this period.

Los Angeles City population growth during these years accounted for 31.2% of the total County increase, while gains within the other 75 cities comprised 68.2% and those in the unincorporated area 0.6%. Growth within the unincorporated area was much greater than indicated, but several incorporations and many substantial annexations masked the actual increase.

First quarter net additions to the Los Angeles County housing inventory totaled 8,435 dwelling units. This was 2,652 units less than reported during the last quarter of 1965, and the smallest quarter by net addition since the close of World War II.

Although there were 2,475 fewer multiple dwelling units added in first quarter than in the last three months of 1965, multiple units still constituted 68.6% of the quarterly net additions to the inventory. Single unit construction held up reasonably well with only 89 fewer units being added in the first quarter than in the final quarter of 1965.

## Federal Special Censuses 1960-1965

A review of Federal special censuses taken during the past six years shows that 179,140 persons were enumerated in six "Specials" as compared with the 3,651,763 counted in the fifty-eight censuses completed during a similar period in the "Fifties." Cities in Los Angeles County surveyed between January 1, 1960 and December 30, 1965 include the following:

Manhattan Beach (1962); Hawaiian Gardens (1964); West Covina (1964); San Dimas (1965); Bell Gardens (1965); and Montebello (1965).

This sharp decline in "Specials" is fundamentally the result of certain changes in the California statutes which recognized for subvention purposes less expensive estimates of the California Department of Finance.

These 100 per cent enumerations are invaluable guide points for those preparing small area estimates particularly as the decade lengthens. Passage of current bills pending in the United States Congress supporting a mid-decade census would do much to alleviate this problem for major metropolitan areas.

## Birth Rate Continues Decline

Provisional 1965 reports indicate that a declining birth rate and an increasing death rate combined last year to give Los Angeles County its smallest net natural increase in a decade.

This local decline in the birth rate has followed a national trend first evident in 1958. The U. S. Public Health Service recently announced a 1965 provisional birth rate of 19.4 per 1,000 population. This compared with previous rates of 21.2 in 1964, 21.6 in 1963; 22.4 in 1962; 23.3 in 1961; and 23.7 in 1960.

Recent Los Angeles County death rates have held within a rather constant range of 8.7-8.8 deaths per 1,000 population. Comparable national rates have also been generally stable but at a higher range of 9.4-9.6 deaths per 1,000 population.

## Adjustments

Major adjustments in this Bulletin included the following: 1. Annexation of 1,970 dwelling units (1,935 single, 30 duplex and 5 multiple) from S.A. 12.21 to S.A. 12.1 (El Monte City); 2. Annexation of 2,562 dwelling units (1,589 single, 536 duplex and 437 multiple) from S.A. 28.65 to S.A. 28.7 (Part of Rosemead City); 3. Reduction of 105 multiple units in the dwelling unit inventory of S.A. 18.2 (Monrovia City) to recognize the cancellation of a housing project; and 4. Reduction of 817 in the population of S.A. 32.4 (Montebello City to recognize the results of a Federal special census taken September 29, 1965.

### LOS ANGELES COUNTY POPULATION WILL PASS SEVEN MILLION

The population of Los Angeles County will pass the seven million mark shortly after midyear moving on to total 7,002,200 by August first. This is an estimated gain of 959,000 inhabitants or 15.8% in the slightly more than six and one quarter years which have passed since the 1960 Census.

Los Angeles County population growth during this period has averaged 415 persons a day. Net natural increase, a surplus of births over deaths, contributed 212 persons or 51% and net in-migration, a greater number moving into than leaving the County, 203 persons or 49% to this total average daily gain.

## LOS ANGELES COUNTY POPULATION (Continued)

County's ten largest cities was as follows: 2. Long Beach 375,663; 3. Torrance 138,414; 4. Glendale 136,348; 5. Pasadena 125,360; 6. Burbank 97,646; 7. Downey 95,823; 8. Norwalk 94,414; 9. Santa Monica 89,433; and 10. Inglewood 88,601.

## AMERICAN NOMAD (Continued)

tween March, 1964, and March, 1965, the latest period for which information is available, approximately 2,200,000 persons or 28.4 percent of those residing at the end of the period in Los Angeles and Orange Counties had moved. This compares with a mobility rate of 27.1 percent for the thirteen Western states and 20.1 percent for the United States.

The Bureau reported their surveys indicated that in the year March, 1964-5, almost 38,000,000 persons one year old or older had moved within the nation while an additional 1,000,000 had come into the country from abroad. These movers included those who moved from one unit to another within the same structure as well as those who moved much longer distances.

Approximately one-fifth of the population of the United States changes residence each year. The Bureau of the Census found in the 18 annual surveys they have conducted since 1948 that the national mobility rate ranged within the narrow limits of 18.6 to 21.0 percent.

Mobility in Los Angeles and Orange Counties has been consistently higher than the national rate. Since the 1960 Census more than one-quarter of the population in the two counties has changed address each year with the Bureau surveys indicating the annual movement as ranging between 26.3 and 28.8 percent.

Most of the moves locally and nationally did not involve long distances. Locally more than three-fourths and nationally two-thirds of those moving did not cross county lines. Of the remaining movers in Los Angeles and Orange Counties, approximately 11 percent had moved into the area from another part of California while the remaining 13 percent were from out-of-state.

These figures exclude approximately 60,000 persons who moved into the two counties from abroad during the survey year.

## ADJUSTMENTS

During the second quarter three cities annexed areas each of which included a substantial number of dwelling units. These resulted in the following changes: 114 single dwelling units were transferred from S.A. 7.521 to S.A. 7.2 (Covina City); 524 single dwelling units from S.A. 28.64 to S.A. 28.8 (Part of Temple City) and 596 single plus 104 duplex dwelling units from S.A. 16.633 to S.A. 16.3 (Hawthorne City).

Two other significant adjustments are reflected in this issue. These are the addition of 253 single dwelling units to S.A. 20.13 to recognize the partial returns of an in progress Commission survey of mobilhome parks in the Newhall-Saugus area; and the removal of 255 single units from the inventory of S.A. 32.11 (Bell Gardens City) to recognize a May 7, 1965 Federal Special Census field count. Bell Garden's population had previously been adjusted in Bulletin No. 89 of July 1, 1965.

## LOS ANGELES COUNTY POPULATION

**October 1, 1966 estimate .....7,015,504**

Los Angeles County population rose 20,125 during the third quarter to reach an October first estimate of 7,015,504. This is an estimated increase of 61,154 since the first of the year and 972,804 in the six and one-half years since the 1960 Census.

The population of the County's seventy-six cities climbed to an October 1 total of 5,914,577. This is a July-October gain of 22,934. Inhabitants within the unincorporated area declined 2,809 persons during the same period, totalling 1,100,927 at the end of the quarter. This loss reflects large annexations to El Monte, South El Monte and Lynwood.

The ranking of the ten largest cities in Los Angeles County remained unchanged. On October 1, 1966 they were as follows: 1. Los Angeles 2,785,900; 2. Long Beach 375,991; 3. Torrance 139,231; 4. Glendale 136,488; 5. Pasadena 125,390; 6. Burbank 97,646; 7. Downey 96,418; 8. Norwalk 94,631; 9. Santa Monica 89,603; and 10. Inglewood 88,847.

## "HERE TO STAY"

Two-thirds of the over one million residents of the San Fernando Valley are "here to stay" according to the results of the recently published Regional Planning Commission *San Fernando Valley Planning Area Opinion Survey.* This random sample of 1,992 Valley households taken in October-November 1965, also revealed a high degree of intra-Valley home changing with fifty-nine per cent of the respondents reporting they had moved at least once since 1959.

Homeowners who represented seventy-one per cent of those interviewed were far less mobile than renters. Sixty-one per cent of the homeowners reported no change of address in this period while only fourteen and one-half per cent of the renters reported no change.

The survey further found that fifty-eight per cent of those who had moved into their present residence since 1963 were renting. However, it was discovered that of those who had moved into their present residence in the four previous years, 1960 through 1963, seventy-three per cent were homeowners while resident owners comprised over ninety per cent of those who had moved into their present homes before 1960.

This publication is the first of several which will report the findings and recommendations of the San Fernando Valley Area Study. This is a cooperative project of the cities of Burbank, Los Angeles, San Fernando and the Regional Planning Commission. A Citizen's Advisory Committee is working with these agencies in the "Destination 90" program to formulate goals for the Valley.

A limited number of copies of this Commission *Opinion Survey* are available. Single copies will be sent upon written request.

*These figures are compiled from a monthly survey of residential new construction, move-ins, removals, demolitions, and alterations reported by each of the permit issuing agencies in Los Angeles County. Unit changes are entered in the estimated housing inventory after either actual or assumed completion.

**These totals include additional adjustments not reported in the regular building permit review.

## ADJUSTMENTS

Annexations which became effective during the third quarter resulted in the following major dwelling unit transfers: 1. 256 units were shifted from S.A. 8.31 to S.A. 8.2 (Lynwood City); 2. 2,173 were deducted from S.A. 12.22 of which 1,443 were added to S.A. 13.1 (El Monte City) and 730 to S.A. 12.3 (South El Monte City); and 3. 177 were subtracted from S.A. 23.311 and added to S.A. 23.5 (Rolling Hills Estates City).

The Commission's survey of mobile home parks in the Newhall-Saugus area was completed in August. In order to reflect the final survey results, 250 units were added to S.A. 20.13 and 20 to S.A. 20.12.

## NEW SOUTHERN CALIFORNIA RESEARCH BIBLIOGRAPHY PUBLISHED

The School of Business Administration and Economics, San Fernando Valley State College, during the past quarter announced the publication of *Research Studies Digest.* This is the first of a projected series of annotated bibliographies reporting continuing or recently published studies concerned with the southern California economy.

Copies of the *Research Studies Digest* may be obtained for $3.00 each by writing to: Bureau of Business Services and Research, School of Business Administration and Economics, San Fernando Valley State College, Northridge, California 91324.
